DESCRIPTION FOR SIDE OUTLET BOTTLE

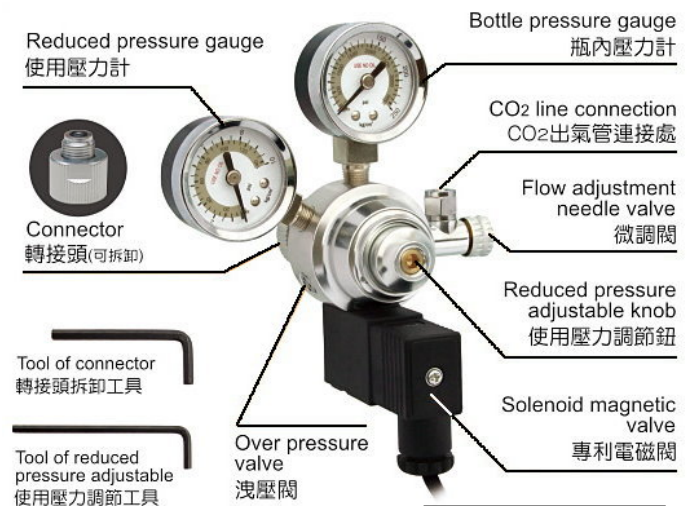

1 bar = 1.02 Kg/cm²
1 bar = 14.5 psi
1 Mpa = 10 bars

ADVANTAGE

- Designed with decompress pressure gate, easily to adjust, stable and accurate CO₂ outlet.
- To take off the connector, the regulator can be used on disposable cartridges.
- Patent solenoid valve, operated with timer or other controller for professional user
- High-effect and energy save design.
- Patent design for long period use, working in silent and without heat produce.
- Universal voltage for worldwide use.
- To take off the connector with enclosed tool, the regulator can be used on disposable cartridges CO₂ bottles.
